

47. (New) A method according to claim 46 in which a suitable amount of food additive composition is from 0.15 to 10% depending on the food product.

48. (New) A method according to claim 46 in which the food additive composition is added to base dough formulations at 0.5% to 5.0%, to base batter formulations at 0.75% to 8.5%, to base potato dough formulations at 0.5% to 3.0%, to fillings/toppings at 1.0% to 5.0%, or to subsequent dough processing steps at 0.1% to 1.5%.

49. (New) A method according to claim 46 in which the food additive ingredient is dusted on the surface of a food to be processed.

50. (New) A method according to claim 46 in which the processed foods are baked or fried, then cooled frozen and packaged.

Respectfully submitted,

Robert C. Klinger
